- Wall-mountable(optional), integrated stand with 2 adjustable angles;
- 1x USB port, support power charging.

## 2. Set up the Phone

### a) Packing List:

Check the packing list before installation, if you find anything missing, contact your system administrator.

- 1\*IP Phone
- 1\*Handset
- 1\*Handset Cable

- 1\*Ethernet Cable
- 1\*Quick Operation Guide
- 1\*Power Adapter
- 1\*Bracket

IP Phone

Handset

Cable

Quick Operation Guide

Ethernet Cable

Bracket

Power Adapter

Wall Mount bracket

( Needs to be purchased separately )

**NOTE:** The cable install method is short A connect the handset, longer B connect the IP Phone.

**b) Phone Installation:**

This section introduces how to install the phone with the components in the packing list:

- Adjust the Bracket
- Connect the Handset and optional Headset
- Connect the Network and Power

**Adjust the Bracket**

Pls follow the following picture to let the bracket adjust to safety

Desk Mount Method

**Connect the Handset and optional Headset**

**Connect the Network and Power**

You have two options for power supply. Your system administrator will advise you which

one to use.

- AC power adapter
- POE(Power over Ethernet) IEEE802.3af
- USB(Standard 0.5A)

Note: If inline power (PoE:Power over Ethernet) is provided, you don't need to connect the power adapter. Make sure the Ethernet cable and hub/switch are PoE compliant.

### 3.7.4 Ring Tone and Volume Setting

Ring Type	<p>--1) Press OK or MENU button;          --2) Press OK or MENU button&gt; System Setting&gt; Phone Setting&gt;Ring Type          --3) Select the ring type from 1 to 8 or custom ring, and then press Save to make it work.</p>
Volume Setting	<p>--1) Press OK or MENU button;          --2) Press OK or MENU button&gt; System Setting&gt; Phone Setting&gt; Volume Setting          --3) Volume Setting: Handset\Speaker\Headset\Ring volume          --4) Press Enter to adjust the volume and press Save to make it work</p>

NOTES: For the Custom Ring Type you need to upload it from website.

### 3.7.5 Searching Phone Book

Accurate Search	--1 ) Press <b>MENU</b> or <b>OK</b> button > "Function Setting", you can select " Accurate Search " --2) Then press Enable/Disable and Save. --3) When you back to idle, you can use the digital keypad to search the contact.
T9 Search	--1) Press <b>MENU</b> or <b>OK</b> button > "Function Setting", you can select " T9 search" --2) Then press Enable/Disable and Save. --3) When you back to idle, you can use the digital keypad to search the contact.

NOTES: The Search Phone Book setting default is Accurate Search.

### 3.7.6 Cannot Set the Features with Keypad

As below features are cannot setting with the keypad:

- 1) Dial Plan.
- 2) Custom Ring Type
- 3) SNTP Server and Time & Date
- 4) Update the Firmware or Backup.

## 4. WEB User Interface

In addition to the phone user interface, you can also customize your phone via web user interface. In order to access the web user interface, you need to know the IP address of your new phone. To obtain the IP address, press the C key on the phone. Enter the IP address (e.g. HTTP://192.168.0.10 or 192.168.0.10) in the address bar of web browser on your PC. The default user name is admin (case-sensitive) and the password is admin (case-sensitive).

**Username**

**Password**

**Language**

**Main Interface-Phone Status**

Here you can see as below information: System Run Time, Register Status, Network Status, System Information,

The screenshot shows the 'Phone Status' main interface with a navigation bar at the top containing icons for Phone Status, Network, SIP Account, DSSKey, Settings, Phonebook, Maintenance, Security, and Logout. The main content area is divided into several sections:

- System Run Time:** 17 Days 1 Hours 58 Minutes 31 Seconds
- Register status:** A list of accounts (Account 1 to Account 6) with their respective statuses. Account 1 is 'Registered', while Accounts 2-6 are 'None'.
- Wi-Fi Status:** A list of parameters including SSID, State, Signal, Mode, Band, BSSID, Encryption, WLAN IP Address, and WIFI MAC.
- System Version:** V0.6
- Network Status:** Parameters including LAN Port type (DHCP) and MAC (00:26:8b:07:11:ba).
- Note:** A box providing definitions for Register status, Network Status, and System Info.

ITEM	DESCRIPTION
System Run Time	The phone system normal running time.
Register Status	The status with Account 1~6.
Network Status	The status with LAN, MAC, LAN IP, Net mask, Gateway, Primary DNS, Secondary DNS, VPN IP, PC IP, PC Net mask, Device Type, DHCP Server.
System Information	The status with Phone Model, Software Version, Hardware Version, Hardware ID, Kernel Version, Auto-Provision Server

	URL, TFTP Server IP.
--	----------------------

## 4.1 Network

### 4.1.1 LAN Port

**DHCP** ?

    Hostname(Option 12)

    Manufacturer(Option 60)

    User Class Information(Option 77)

**Static IP** ?

    IP Address

    Subnet Mask

    Gateway

    Static DNS  on  off

    Primary DNS

    Secondary DNS

**PPPoE** ?

    Username

    Password

    MTU  Default: 1500

ITEM	DESCRIPTION
Network Connection Mode	Network Connection Mode has DHCP, Static IP, PPPoE
DNS Settings	Select the DNS mode that you want.

## 4.1.2 PC Port

The screenshot shows a configuration interface for the PC Port. It features two radio button options: "As bridge" (selected) and "As router". Below these are several input fields and a toggle switch:

- As bridge** (selected) with a help icon (?)
- As router** (unselected) with a help icon (?)
- IP Address**: text input field
- Subnet Mask**: text input field
- Router DHCP**: toggle switch set to "off" (with "on" option)
- Start IP address**: text input field
- End IP address**: text input field

### AS Bridge

Normally, you should choose "bridge" feature, it means that pc port and LAN port will share the same network.

### AS Router

Router feature is for the phone PC Port. You must input IP address (it's equivalent to a gateway) and Net mask. If you want to use DHCP function, please turn it on, input start IP and end IP.

## 4.1.3 Advanced

### VPN Setting

**VPN Settings >>**

Enable VPN

VPN Type

**L2TP**

VPN Server Addr

VPN Username

VPN Password

**OPEN VPN** (Attention: The trusted certificates directory is /mnt/sip/vpn/)

Upload VPN configuration

When using VPN Setting option, you can set several parameters as follow:

<b>VLAN Setting</b>	
Enable VPN	You can enable/disable VPN for phone and pc.
VPN Type:	Choose the appropriate type of VPN.
VPN Server Addr	VPN server's IP.
VPN User Name	VPN user's name
VPN Password	A password be used for authentication
OPEN VPN	Upload the *.ovpn file to the phone
Upload VPN cfg	Select the VPN configuration to upload

## VLAN Setting

**VLAN Settings >>**

**LAN Port**

Enable VLAN

VID  (0~4094)

Priority  (0~7)

**PC Port**

Enable VLAN

VID  (0~4094)

Priority  (0~7)

When using VLAN Setting option, you can set several parameters as follow:

VLAN Setting	
Enable VLAN	You can enable/disable VLAN for phone and PC
VID [LAN/PC Port]	The VLAN ID you want the phone or PC to join

## Port Management Settings

**Port Management Settings >>**

HTTP Port  (1-65535)

Telnet  off  on

Telnet Port  (1-65535)

Local SIP port  (Default: 5060)

RTP port range  --

**Please Note:** After changing the default HTTP port 80, please restart the machine to take effect. Using the new HTTP port to access the Web user interface "http://ipaddr:port".

Port Management Settings	
HTTP Port	The default web port is 80,if you want to change it(for example change it to88), You must input IP and Web port to login the web page(for example <a href="http://192.168.0.200:88">HTTP://192.168.0.200:88</a> ). It will take effect on next reboot.

Telnet Port	The default Telnet port is 23,if you want to change it(for example change it to 2003). You must input IP and Telnet port to login the manage page (for example telnet 192.168.0.200:2003).It will take effect on next reboot.
Local SIP Port	You can change the local SIP port to another, The default local SIP port is 5060.
RTP Port Range	You can change the RTP port range to another, The default RTP port range is 10000 to 10128.

## QoS

Qos >> ?

SIP Qos  (0-63)

Voice Qos  (0-63)

ITEM	DECSRIPTIO
SIP QoS	The range is 0~63,default is 26
Voice QoS	The range is 0~63,default is 46

## Network Packet Mirroring

Network Packet Mirroring >>

Network Packet Mirroring  ▾

Network Packet Mirroring	When select on, then you can capture the phone's packet use notebook which connect to pc port of the phone
--------------------------	--

## 802.1x Settings

802.1x Settings >>

802.1x Mode

802.1x Identity

MD5 Password

CA Certificates

ITEM	DECSRIPTIO
802.1x Mode	You can setting the 802.1x mode to EAP-MD5 or PEAP-MSCHAPv2. Default is disable.
802.1.x Identity	You can setting the 802.1.x Identity here.
MD5 Password	You can setting the MD5 Password here.
CA Certificates	You can upload the CA Certificates here.

## LLDP

LLDP >>

LLDP  off  on

LLDP Packet Interval  s(1-3600)

ITEM	DECSRIPTIO
LLDP	Enable/Disable the LLDP feature.
LLDP Packet Interval	You can setting the LLDP packet Interval here. Default is 60s.

## Paging Setting

**Paging Setting >>**

Paging 1	<input checked="" type="radio"/> off <input type="radio"/> on
Group IP	<input type="text"/> Port: <input type="text" value="10000"/>
Paging 2	<input checked="" type="radio"/> off <input type="radio"/> on
Group IP	<input type="text"/> Port: <input type="text" value="10000"/>
Paging 3	<input checked="" type="radio"/> off <input type="radio"/> on
Group IP	<input type="text"/> Port: <input type="text" value="10000"/>
Paging 4	<input checked="" type="radio"/> off <input type="radio"/> on
Group IP	<input type="text"/> Port: <input type="text" value="10000"/>
Paging 5	<input checked="" type="radio"/> off <input type="radio"/> on
Group IP	<input type="text"/> Port: <input type="text" value="10000"/>

**Paging Setting(NOTE: This feature priority is followed the serial number, In other words, "paging 1" is the highest priority)**

Paging1	Enable/Disable Paging feature.
Group IP and Port	Group IP and Port with Paging.

# 5 SIP Account

## 5.1 Basic

Account	Account1 ▾
Enable	<input checked="" type="checkbox"/> ?
Account Mode	VOIP ▾
Number Of Lines	1 * ?
Display Name	<input type="text"/> ?
Username	3017 * ?

Password	•••• ?
Label	<input type="text"/> ?
SIP Server	192.168.0.7 * ?
Secondary server	<input type="text"/> ?
Outbound Proxy Server	<input type="text"/> ?
Secondary Outbound Proxy Server	<input type="text"/> ?
Polling interval time of registration	32 s Default value: 32s , range: 20s~60s
NAT Traversal	Disabled ▾ ?
STUN Server	<input type="text"/> ?
Register Expiration Time	3600 Default: 3600s, Min: 40s ?
Auto Answer	<input checked="" type="radio"/> off <input type="radio"/> on
SIP Transport	<input checked="" type="radio"/> UDP <input type="radio"/> TCP <input type="radio"/> TLS ?
Ring type	None ▾ ?

Choose one Account, you will find the following parameters:

ITEM	DECSRIPTIO
Account	Select the Account Number what you want to set.
Enable	You can choose on/off to enable/disable the line.
Account Mode	VOIP mode
Number Of Lines	The line key of account used, default is 1.

Display Name	It is showed as Caller ID when making a phone call
Username	It is a username provided by SIP Server
Authenticate Name	It is authenticated ID for authentication
Password	It is a password provided by SIP Server
Label	Label with this account.
SIP Server	Server for registration, provided by administrator
Secondary server	When the main server can't work, it also can register in this secondary server.
Outbound Proxy	Put into the address with the outbound proxy server.
Secondary Outbound Proxy Server	When the main out bound server can't work, it also can use this secondary server.
Poling Interval Time Of Registration	Poling Interval Time Of Registration, default is 32 s.
NAT Traversal	Defines the STUN server will be active or not
STUN Server	Session traversal utilities for NAT.
Register Expiration Time	IP phone automatically registered every time
SIP Transport	There are UDP/TCP/TLS three options
Ring Type	Select this account ringing type.

## 5.2 Advanced

Account	Account1 ▾

ITEM	DESCRPTION
------	------------

<b>Advanced</b>	
Account	Select the Advanced Setting account.
RPort	A parameter used for through registration.
Message	Setting the Voice Message feature code number
Do Not Disturb	Enable/Disable Do Not Disturb
Anonymous Call	Enable/Disable anonymous call.
Anonymous Call Rejection	Enable/Disable anonymous call rejection.
Use Session Timer	Enable/Disable refresh session function. The device will send an Invite packet to refresh the session during a call if it enable.
Session Timer	The refresh session time interval.
Refresher	Defines which side refreshes the session. UAC: To refresh the session from the client side. UAS: To refresh the session from the server side.
Call Method	This method include SIP and TEL.
DNS-SRV	Enable/Disable DNS-SRV.
Allow-events	Enable/Disable Allow-events.
Registered NAT	Enable/Disable Registered to NAT
Keep-alive Type	Default is UDP, or you can change to Options or Notify or disable it.
Keep-alive Interval	Default is 30 second.
User user=phone	There will be a sign user=phone in the invite packet of the SIP message.
Conference Way	Default is conference on phone. You can change on server.
Network-based conference URI	Setting the Network-based conference URI
BLA	Bridge Line Appearance, extensions share one line
BLA Number	Setting the BLA Number
Subscribe Period	Subscribe expiration time. Default is 1800.
SIP Encryption	Enable/Disable SIP encryption.
Encryption Algorithm	The encryption algorithm at this time we only have RC4.
Encryption Key	The key with encryption.
Voice Encryption(SRTP)	Enable or disable voice encryption(SRTP).
EP+ Outcode Switch	Enable or disable EP+ Outcode feature
OutCode	Setting the EP+ Outcode
OutCode Length	Setting the EP+ Outcode Length

ITEM	DESCRPTION
Paperless Program Keys	Enable/Disable the paperless program keys feature.
Key1~24	The key amount depend on the lines, and support 4 page. 24=4*6;
Mode	Support Speed Dial,Speed Dial Prefix, DTMF, BLF, Paging, Call Park, Intercom, Pickup, XML Browser, Broadsoft BLF, BLA.
Account	Select account to make it work
Name	The name of the key
Number	The number of the key

## 6.2 Line Keys

	Operation	Account	Name	Number
Key1	Line	Account1		
Key2	Line	Account1		
Key3	Speed Dial	Account1		
Key4	Speed Dial Prefix	Account1		
Key5	DTMF	Account1		
Key6	BLF	Account1		
	Paging	Account1		
	Call Park	Account1		
	Intercom	Account1		
	Pickup	Account1		
	XML Browser	Account1		
	Broadsoft BLF	Account1		
	BLA	Account1		

300IP-6P have 6 line keys:

ITEMS	DESCRIBES
Line	The default value.
Speed Dial	You can use this key feature to speed up dialing the numbers often used or hard to remember.
Speed Dial Prefix	You can use this key feature to speed up dial a call with a specified prefix number.
DTMF	You can use this key feature to send the specification of arbitrary key sequences via DTMF.
BLF	You can use the BLF feature to monitor a specific user for status changes on the phone.
Paging	You can use multicast paging to quickly and easily forward time sensitive announcements out to people within the multicast group.
Call Park	You can use call park feature to place a call on hold, and then retrieve the call from another phone in the system (for example, a phone in another office or conference room).
Intercom	You can press the configured intercom key to automatically connect with a remote extension for outgoing intercom calls, and the remote extension will automatically answer the incoming intercom calls
BLA	This feature such as the BLF.

NOTE: ONLY WHEN YOU CHOOSE "SPEED DIAL", THE RIGHT OF "NAME","NUMBER" WILL TAKE EFFECT.

## 6.3 Function Keys

Function Keys: If you do not like the default setting with the function keys feature. You

can change to whatever you like.

NOTE: IF THE PHONE WITHOUT THE KEY, YOU CAN IGNORE IT.

Note: if the phone has no key, you don't need to set the key

	Operation	Account	Name	Number
Up	Default	Account1		
Down	Redial	Account1		
Left	DND	Account1		
Right	Contacts	Account1		
OK	Enterprise Phonebook	Account1		
Conference	LDAP	Account1		
Redial	Dir	Account1		
Transfer	Speed Dial	Account1		
Hold	Call List	Account1		
Service	Missed Calls	Account1		
Directories	Received Calls	Account1		
Menu	Dialed Calls	Account1		
Mute	Menu	Account1

## 8 Phone Book

The phone book including Group, Contact, LDAP and Ban list, please review the following for more details:

### 8.1 Contact

You can add, edit and delete contact in a phone book on this web page .  
The phonebook can storage 300 contacts entry

<input type="button" value="Delete"/>	ID	Operation	Name	Phone	Group
<input type="checkbox"/>	1	   	test test	Number1: <a href="#">1111</a>	

Serial number	1
First name	test
Last name	test
Office Number	1111
Mobile Number	
Home Number	test
Work Number	
Main Number	test@test.com
Fax Number	
Other Number	
Group1	None

If you want to add a Contact, you just ought to click 'Add Contact' .

You can edit an existed Contact by click  .

You can delete an existed Contact by click  , if you want to delete all Contacts, you just ought to click 'Delete All Contact'.

You can edit or move this contact to Ban List after you select  .

You can download and save this contact to PC after you select  .

## 8.2 Group

You can add, edit and delete group in a phone book on this web page.

ID	Operation	Group name	Group member	Description	Ring type
1	 	testgroup1	0	testgroup1	Ring2

Serial number	1
Description	testgroup1
Group name	testgroup1
Ring type	Ring2

If you want to add a Group, you just ought to click 'Add Group' .

You can edit an existed Group by click .

You can delete an existed Group by click , if you want to delete all Groups, you just ought to click 'Delete All Group'.

## 8.3 LDAP

**NOTES: If you want to know more detail about LDAP, pls find it in the office website to download the specific document.**

**As below figure is an example.**

e.g.

LDAP Name Filter:(sn=%s)

LDAP Number Filter:(telephoneNumber=%s)

Server Address:192.168.0.65

BASE:DC=ldap,DC=Motorola,DC=com

User Name: bb@ldap.Motorola.com

Pass Word: Motorola\_2012

LDAP Name Attributes 1:sn

LDAP Name Attributes 2:cn

LDAP Number Attributes 1:telephoneNumber

LDAP	<input type="radio"/> on <input checked="" type="radio"/> off	?
LDAP Name Filter	<input type="text"/>	?
LDAP Number Filter	<input type="text"/>	?
Server Address	<input type="text" value="0.0.0.0"/>	?

## 8.4 Blacklist

You can add, edit and delete contact in a Ban List on this web page .

Serial number

Description

First name

Last name

Mobile number

Office number

Other number

Account 

- Auto
- Account1
- Account2
- Account3
- Account4
- Account5
- Account6
- Account7
- Account8

ID	Operation	Name	Phone	Description	Account
1	  	name1 lastname1	Number1:1111 Number3:2222	blacklist1	1

If you want to add a Ban List, you just ought to click 'Add Ban List'.

You can edit an existed Ban List by click .

You can delete an existed Ban List by click , if you want to delete all Ban List, you just ought to click 'Delete All Ban List'.

You can edit or move this contact to Contact after you select .

## 8.5 Phone Call Info

You can remote or local control the IP phone to make a call by WEB.

Dial a Number

Outgoing Account

# 9 Maintenance

**NOTES: Don't cut off the electricity or network cable when doing upgrade in the below ways!**

## 9.1 HTTP Upgrade

You can upgrade the software, kernel and configuration etc. files by HTTP.

Select a File	<input type="text"/>	浏览...
Software Upgrade	<input type="button" value="Upgrade"/>	
Configuration	<input type="button" value="Upload"/> <input type="button" value="Download"/>	
XML Personal Phonebook	<input type="button" value="Upload"/> <input type="button" value="Download"/> <input type="button" value="View Phonebook"/>	
CSV Personal Phonebook	<input type="button" value="Upload"/> <input type="button" value="Download"/> <input type="checkbox"/> Show CSV Title	
Vcard	<input type="button" value="Upload"/> <input type="button" value="Download"/>	
EXT Module	<input type="button" value="Upload"/> <input type="button" value="Download"/>	
Log	<input type="button" value="Download"/>	
All Config Files	<input type="button" value="Download"/>	

When using HTTP upgrade, you can set several parameters as follow:

HTTP Upgrade	
Select a File	Browse the software/kernel/configuration file which you need to upgrade from HTTP
Software Upgrade	Used for upgrading the software of the phone
Kernel Upgrade	Used for upgrading the kernel of the phone
Configuration	You can used upload/download to upload/download the configure file of the phone
XML Phone Book	Used for uploading/downloading the XML phonebook of the phone
Vcard	Downloading all contacts in the Vcard mode, but upload only support one by one.
EXT Module	Used for updating/backup the expansion of the phone <b>[NOTES: The mode doesn't support this feature]</b>
Log	Used for the administrator to find out or making sure the problem with this equipment.

All Config File	All Config File includes: Configuration, Extern, Log, XML Phone book, Enterprise Phone Book.
-----------------	--

## 9.2 FTP Upgrade

You can upgrade the software, kernel and configure files by FTP.

Server IP	<input type="text"/>	Note: It's not necessary to input a file name for backup.
File name	<input type="text"/>	()
Username	<input type="text"/>	
Password	<input type="text"/>	
Software Upgrade	<input type="button" value="Upgrade"/>	
Configuration	<input type="button" value="Update"/> <input type="button" value="Backup"/>	
Phone Book	<input type="button" value="Update"/> <input type="button" value="Backup"/>	
EXT Module	<input type="button" value="Update"/> <input type="button" value="Backup"/>	

When using FTP upgrade, you can set several parameters as follow:

FTP Upgrade	
Server IP	The IP address of the FTP server
Filename	Downloading from FTP server
Username	Providing by FTP server
Password	Providing by FTP server
Software Upgrade	Used for upgrading the software of the phone
Kernel Upgrade	Used for upgrading the kernel of the phone
Configuration	Used for updating/backup to update/backup the configure file of the phone
Phone Book	Used for updating/backup to update/backup the phonebook of the phone
EXT Module	Used for updating/backup the expansion of the phone <b>[NOTES: The mode doesn't support this feature]</b>

**NOTES: It's not necessary to input filename when doing backup Configuration, Phone Book, EXT Module.**

## 9.3 TFTP Upgrade

You can upgrade the software, kernel and configure files by TFTP.

Server IP	<input type="text"/>
File name	<input type="text"/> Note: It's not necessary to input a file name for backup.
Software Upgrade	<input type="button" value="Upgrade"/>
Configuration	<input type="button" value="Update"/> <input type="button" value="Backup"/>
Phone Book	<input type="button" value="Update"/> <input type="button" value="Backup"/>
EXT Module	<input type="button" value="Update"/> <input type="button" value="Backup"/>

When use TFTP upgrade, you can set several parameters as follow:

TFTP Upgrade	
Server IP	The IP address of the TFTP server
Filename	Downloading from FTP server
Software Upgrade	Used for upgrading the software of the phone
Kernel Upgrade	Used for upgrading the kernel of the phone
Configuration	Used for updating/backup the configure file of the phone
Phone Book	Used for updating/backup the phonebook of the phone
EXT Module	Used for updating/backup the expansion of the phone <b>[NOTES: The mode doesn't support this feature]</b>

**NOTES: It's not necessary to input filename when doing backup Configuration, Phone Book, EXT Module.**

## 9.4 Auto Provisioning

When you open this auto provision feature, the phone will do auto provision after it detect a different software or kernel (Higher or Lower) which are putted on the TFTP,HTTP,HTTPS,FTP, server. For the detailed information about auto provision, you can find it in the official website.

PNP active	<input checked="" type="radio"/> on <input type="radio"/> off <span>?</span>
PNP Interval (minutes)	<input type="text" value="60"/>
Auto Provision	<input checked="" type="radio"/> on <input type="radio"/> off
Protocol	<input type="text" value="TFTP"/> ▼
Software Server URL	<input type="text" value="voip.autoprovision.com"/>
Username	<input type="text"/>
Password	<input type="text"/>
Auto Download Software	<input checked="" type="checkbox"/>
Auto Download Config File	<input checked="" type="checkbox"/>
Auto Download Expansion	<input checked="" type="checkbox"/>
Auto Download Enterprise Phonebook	<input checked="" type="checkbox"/>
Auto Download Personal Phonebook	<input checked="" type="checkbox"/>
Bootling Checked	<input checked="" type="checkbox"/>
Zero Active	<input checked="" type="radio"/> off <input type="radio"/> on <span>?</span>
Wait Time(1~100s)	<input type="text" value="10"/> <span>?</span>
Disable the phone while booting	<input checked="" type="radio"/> off <input type="radio"/> on
Auto Provision Frequency	<input type="text" value="168"/>
Auto Provision Time	<input type="text" value="None"/> ▼
Next Auto Provisioning	Wed Jul 5 11:29:04 2017 <input type="button" value="Reset timing"/>
AES Enabled	<input checked="" type="radio"/> off <input type="radio"/> on
AES Key	<input type="text"/>
Download file name	<input type="text" value="Default"/> ▼
<input type="button" value="Auto Provision now"/>	

When using auto provision, you can set several parameters as follow:

<b>Auto Provision</b>	
PNP active	The request to the server is to obtain a support URL for upgrade.
PNP Interval(minutes)	Setting the PNP interval.
Auto Provision	You can enable/disable auto provision by select on/off
Protocol	Used for auto provision, it includes TFTP/HTTP/FTP
Software Server URL	The server address of the auto provision
Username	Providing by provision server

Password	Providing by provision server
Auto Download Software	Used for auto download software from server
Auto Download Kernel	Used for auto download kernel from server
Auto Download Config File	Used for auto download config file from server
Auto Download Expansion	NOTES: The model doesn't support this feature.
Auto Download Enterprise Phonebook	Used for auto download Enterprise Phonebook from server
Auto Download Personal Phonebook	Used for auto download personal phonebook from server
Bootling Checked	Used for checking the auto provision when phone booting
Zero Active	Enable or disable zero-sp-touch which is used to download configuration on the server during the phone power on.
Wait Time(1~100s)	The time when configuration interface of zero-sp-touch will show up when power on.
Disable the phone while bootling checking	Enable/Disable the bootling checking feature.
Auto Provision Frequency	Used for setting the time interval for auto provision
Auto Provision Time	Used for the specific time for auto provision
Auto Provision Next Time	Reset the Auto Provision Next Upgrading time.
AES Enable	You can enable/disable AES encrypt for auto provision
AES Key	The key of the AES
Download file name	Setting the download file name for Upper case or Lower case
Auto Provision Now	Used for doing auto provision immediately

## 9.5 Log

This feature is use for the administrator to managing the equipment, like debugging, SIP etc,. If you need to catch a debugging Level, you need to setup on this interface.

No record  
 Call Error Level   
 SIP  
 LCD  
 Log Save Location  Local  Terminal  LogServer  
 Log Server Address  :   
 Capture packet

## 9.5 Local Log

Check the log file on the local.

<input type="button" value="Delete"/>	ID	Operation	FileName	Size
<input type="checkbox"/>				

## 9.6 Default Settings

You can load the phone to the factory default setting in default setting option.

Click [Reset to Factory Settings](#) button to restore all settings to the factory default state.

Press the 'Reset to Factory Setting' option, the phone will load to factory default setting on next reboot.

## 9.7 Reboot

You can use reboot option to reboot the phone.

Attention: Rebooting the phone will result in temporary loss of phone and web services, click reboot to continue.

Reboot

## 10 Security

### 10.1 Password

Here you can setting the administrator or user WEB password management. Select your type. If you login as an administrator, you can modify both the user's and admin's passwords.

Administrator  User

Username

Old password

New password

Confirm password

### 10.2 Trusted Certificates

Name	Begin time	End time	Operation
Trusted certificates upload <input type="text"/>			浏览...
<input type="button" value="upload"/> <input type="button" value="Delete all certificates"/>			

### 10.3 IP Strategy

You can use IP Strategy feature to make a list which can be set to only allow the incoming call on the list.

e.g. As following picture you can see it has 192.168.0.248 in the list. When you open this feature. It means you just allow come from this IP address meeting

IP Strategy <input checked="" type="radio"/> off <input type="radio"/> on				
ID	Operation	IP Address	Description	Account
<a href="#">Add IP Strategy</a> <a href="#">Delete all IP Strategies</a>				

## 11 WEB Other Settings or Information -

### Appendix

#### 11.1 Logout

Logout the IP Phone web management.

#### 11.2 Note Tips

In the right middle of the website page, there is a Note tips in every function page. Hope it can help you to know something about that.

**Note**

**Register status:**  
It shows the Register Status.

**Network Status:**  
It shows the information of LAN port and PC port.

**System Info:**  
It shows the version of firmware
